

Standard Template — Approval Note

Form MNT-AN Rev. 3. All approval notes shall follow this structure.

SYNTHETIC DOCUMENT - created for a Smart India Hackathon prototype demonstration. Not real plant data.

1. Heading

Title in the form: Approval Note — [equipment tag] [work]

Reference number, date, and the name of the person preparing it.

2. Background

Two or three sentences on the equipment and why the note is raised. State the work order number and the date of the triggering event.

3. Findings

What was observed, as short numbered points. Each finding must cite the source document and page it came from. State measured values against their required values.

4. Assessment

One paragraph attributing the cause. Distinguish the immediate cause from the underlying cause. Reference any trend in the maintenance history.

5. Recommendation

Numbered actions, each one specific and assignable. Include part numbers where a replacement is proposed, and the revised interval where a change of frequency is proposed.

6. Cost and Downtime

Estimated cost in Rs. and estimated downtime in hours. Where a figure is not known, say so rather than omitting the line.

7. Approval

A closing line requesting approval from the named authority.

Prepared by / Reviewed by / Approved by, each with a date.
