

# Standard Template — Technical Report

Form ENG-RP Rev. 4. Applies to inspection, failure analysis and study reports.

SYNTHETIC DOCUMENT - created for a Smart India Hackathon prototype demonstration. Not real plant data.

## 1. Title block

Report title, reference number, date, author and reviewer.

## 2. Summary

Five lines at most. The finding and the recommendation. A reader who stops here should still know what to do.

## 3. Scope

What was examined, over what period, and what was excluded.

## 4. Findings

Numbered. Each cites its source document and page. Measured values are given against their specified values, with units.

## 5. Analysis

How the findings connect. State the cause and the evidence for it. Where evidence is incomplete, say so.

## 6. Recommendations

Numbered and assignable, each with an owner and a due date.

## 7. References

Every document relied upon, with its revision and date.
